

Childcare First Aid Kit

code 81-8170

Are you prepared to deal with an emergency involving a child?

Parents, teachers and childminders should not underestimate the importance of having a first aid kit **specifically** designed for children. You could save a life. The 'Childcare first aid kit' has been put together to make sure you're prepared for every eventuality when working with children. You know that accidents **WILL** happen. So ordering the kit is all about peace of mind.

Specialist childcare kits; if it has the Steroplast name on, it is safe for use on children. We guarantee it!

Let us dispel a myth, once and for all. You absolutely can put a plaster on a child. A responsible adult can use a hypoallergenic plaster on an injured child. Sterostrip washproof plasters are the plaster of choice for this.

Based on a combination of advice from

- The Health and Safety Executive
- The Pre-School Learning Alliance

The contents of our kit have been put together under the watchful eye of a course tutor specialising in childcare first aid courses.

OFSTED compliant
